

FlexDeck

A high quality, low maintenance, anti-slip membrane for walkable roofs

The perfect roofing solution for functionality, appearance and durability

About the Product

FlexDeck PVC is a high quality, low maintenance, antislip membrane manufactured with internal polyester reinforcement to withstand foot traffic. Its advanced, UV-stable chemical composition protects against sun damage and ensures long-lasting performance. FlexDeck is stain resistant and easily cleans with a brush and all-purpose cleaner.

Benefits and features

- Anti-slip
- Reinforced to withstand foot traffic
- UV stable
- Stain resistant
- Easy to clean
- Low maintenance
- High quality

FlexDeck

Waterproofing Solution for all deck types

FlexDeck PVC eliminates moisture intrusion and stays cool in extreme heat

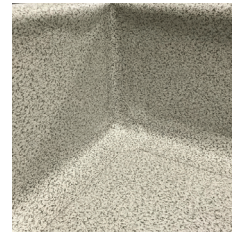

FlexDeck PVC can withstand multiple freeze/thaw cycles without shrinking, even in the harshest weather conditions!
