

# Flex Roof Systems for Solar Installations

## Flex provides Solar Ready Roof Assemblies

- Recommended use with an **Adhered Roof System Application**
- Roof Membrane should be a minimum of **60 Mils in thickness**
- Roof Insulation of high compressive strength minimum of **25psi**
- An approved cover board at least **¼" in thickness** should be installed on top of the Insulation

### Flex PowerGrip and PowerGrip Plus

The Flex PowerGrip and PowerGrip Plus are roof mounting systems designed to secure ballasted and rail-based solar racks and other equipment to Flex single-ply roofing systems.
